### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11-21 of copending Application No. 10/349875. Although the conflicting claims are not identical, they are not patentably distinct from each other because coextensive in scope.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Willinger et al. (5964190).

As to claim 1, Willinger et al. discloses a kennel having a lower portion and an upper portion; a plurality of first guide slots and a plurality of second guide slots in opposition to one another within an interior of said kennel and a partition member selectively received within a set of said slots (fig. 7).

As to claims 2 and 12, disclosed are the slots positioned within the lower portion.

As to claims 3 and 13, disclosed are the slots positioned within said upper portion of said kennel (fig. 8).

As to claims 4 and 14, disclosed are the slots distally spaced apart (fig. 7).

As to claims 5 and 15, disclosed are the slots equidistantly spaced apart (fig. 7).

As to claims 6 and 16, disclosed are the slots vertically oriented.

As to claims 7 and 17, disclosed are the guide slots comprised of a pair of opposing side ridges.

As to claims 8 and 18, disclosed are said slots extending into said lower and upper portions.

As to claims 9 and 19, disclosed are the guide slots frictionally receiving said partition member.

As to claim 10, disclosed is the partition member separating the kennel into a front and rear portion (fig. 7).

As to claim 11, disclosed is a kennel having a lower and upper portion; a plurality of first and second guide slots in opposition to one another and a partition member (fig. 7 and 8).

As to claim 20, disclosed is the method steps of removing an upper portion, positioning a partition member and securing said upper portion to said lower portion.
